Naresh Kumar Devulapally

United States | +1 (716) 256-7463 | devulapa@buffalo.edu | LinkedIn | naresh-devula.github.io

Summary

- PhD Candidate in Computer Vision, specializing in **Multimodal Learning, Vision-Language Models and Generative AI**, seeking full-time Research Scientist roles, available from **December 2026**.
- Strong publication record at **CVPR, ICCV, AAAI, CoLM, ACM MM**, with a proven track record of developing and productionizing AI systems across Generative AI and Multimodal Learning.

Education

The State University of New York at Buffalo May 2024 – May 2027 (Expected)
Ph.D., *Computer Vision and Machine Learning* | PhD Thesis Slides Buffalo, New York, USA
Advisor: Dr. Vishnu Lokhande, Committee: Dr. Siwei Lyu, Dr. Junsong Yuan

- ***Chair's Fellowship for Research Excellence**, University at Buffalo, SUNY, 2024*
- ***CSE Graduate Teaching Award for Teaching Excellence**, University at Buffalo, SUNY, 2025*

The State University of New York at Buffalo August 2022 – May 2024
Master of Science in Computer Science and Engineering Buffalo, New York, USA
MS Thesis: *Towards Generalizable and Robust Multimodal ML Models*

National Institute of Technology, Tiruchirappalli June 2016 – June 2020
Bachelor of Technology in Mechanical Engineering Tiruchirappalli, Tamil Nadu, India

Work Experience

Adobe | *Research Scientist Intern* | *Manager: Dr. John Collomosse* **May 2026 – Present**
Content Authenticity, Audio-Video Watermarking, Multimodal AI, PyTorch San Jose, CA, USA

- **Trained a multimodal audio-video watermarking model from scratch**, joining video and audio through learned bidirectional cross-attention at the encoder and detector, recovering a **256-bit payload** with missing-modality tolerance.
- Achieved **97.2% / 96.3% bit accuracy** on AVA and VGGSound under 24 paired real codec attacks (H.264, H.265, JPEG, AAC, MP3, resampling, noise, masking), maintaining ∼48 dB video PSNR.
- Won all 24 paired attack conditions on both datasets against VideoSeal and HierMark, by **+3.2 and +5.1 points** on attacked recovery; distributed multi-node pre-training and mid-training with mixed precision.

Computer Vision and Machine Learning Lab | *Research Assistant, Ph.D.* **May 2024 – Present**
Multimodal Learning, Vision-Language Models, Audio-Video-Text Fusion Buffalo, NY, USA

- Developed a prompt-inversion framework in diffusion LLMs giving interpretable, edit-friendly prompts with a **∼10× reduction in inversion time**. *(CVPR 2026, with Adobe Research)*
- Watermarking **NVIDIA Cosmos world foundation models** in collaboration with NVIDIA: LoRA on the generation stream of Cosmos3-Nano, parameter-matched against Meta's Pixel Seal, wins **all 18 attack conditions at 5 matched quality levels**, by +10.5 points clean and +19.2 under VAE regeneration.
- Built object-level, in-generation watermarking for text-to-image latent diffusion by fine-tuning only the text token embeddings: **99% bit accuracy at 48 bits with $10^5\times$ fewer trained parameters**. *(ICCV 2025, with Adobe Research)*

Visual Computing Lab | *Research Assistant, MS Thesis* **August 2022 – May 2024**
Multimodal Learning, Transformers, Audio-Video-Text Modeling Buffalo, NY, USA

- Built **multimodal transformer and knowledge-distillation** architectures fusing **audio, video and text** for conversational emotion recognition, on datasets of **∼1M utterances**, with up to **∼10% improvement** over unimodal baselines. *(ACM MM 2023, BigMM 2023)*
- Handled **missing and misaligned modalities** at inference via joint embedding learning, so recognition degrades gracefully when a stream drops. *(ICME 2024)*

Carbynetech, Inc. | *Senior Data Scientist* **August 2020 – July 2022**
Production AI, Object Detection, Forecasting Models, Optimization Hyderabad, India

- Deployed a real-time object detection pipeline using Flask APIs on Azure Web Services for export-pallet inspection; **achieved 94% mAP** and reduced manual inspection time by over 60%.
- Led development of Trade Promotion Optimization (TPO) product, combining demand forecasting, what-if analysis, and KPI tracking; **increased ROI by over 30%**.

Technical Skills

- **Languages & Frameworks:** Python, C++, CUDA, PyTorch (DDP/FSDP), JAX/Flax, TensorFlow, Hugging Face (Transformers, Diffusers, Accelerate, PEFT), OpenCV
- **Multimodal & Vision-Language:** Vision-Language Models (VLM/MLLM), Cross-Modal Learning, Audio-Video-Text Fusion, Multimodal Transformers, Missing-Modality Robustness, Knowledge Distillation, Visual Question Answering, Multimodal Retrieval, CLIP
- **Generative & Foundation Models:** Diffusion Models, Latent/Stable Diffusion, Text-to-Image/Video Generation, World Foundation Models (NVIDIA Cosmos), Prompt Inversion, Fine-tuning (LoRA/PEFT), RLHF / Preference Optimization
- **Systems & Scaling:** Distributed / Multi-Node Training (Slurm), Inference Optimization, Docker, Kubernetes, AWS, GCP, Azure
